

CDC Committee on Science Education (2019-2021)

Gist of Fifth Meeting

Date of meeting: 28 July 2021

1. The minutes of the fourth meeting of CDC Committee on Science Education (2019-2021) held on 9 March 2021 were confirmed without any amendment.
2. The measures to optimise the four Senior Secondary core subjects and the phasing out of Integrated Science and Combined Science were reported and discussed.
3. The support measures for enhancing science education in primary and secondary schools were reported and discussed. Details about the support measures, including the provision of professional development programmes, student activities and learning and teaching resources, and the plan for enhancing science education for upper primary levels, were reported.
4. The progress of the support measures and student activities for the promotion of STEM education, including the provision of STEM-related professional development programmes, large-scale activity and public lectures, and the tasks of the Standing Committee on STEM Education, were reported and discussed.
5. The science subject frameworks of National Security Education were briefed.
