

## **CDC-HKEAA Committee on Chemistry (2013-2015)**

### **Gist of the 1<sup>st</sup> Meeting**

**Date of meeting:** 21-10-2013

**Salient points of the discussion:**

1. The terms of reference, roles and functions of the CDC-HKEAA Committee on Chemistry (2013-2015) were explained to members.
2. The short-term review for senior secondary curricula, the guidelines for the medium-term review, and the streamlining arrangement for the School-based Assessment of Chemistry and Combined (Chemistry Part) for the 2014 HKDSE examination and thereafter were reported to members.
3. Key issues for the medium-term review were discussed. The following issues were suggested for future deliberation:
  - To address the implementation challenges of Combined Science (Chemistry Part)
  - To discuss the unbalanced popularity of elective topics in the Chemistry curriculum
  - To collect views continuously from schools and other stakeholders
