

CDC-HKEAA Committee on Chemistry (2013-2015)
Gist of the 4th Meeting

Date of meeting: 9-7-2014

Salient points of the discussion:

1. The progress for the medium-term review of school-based assessment (SBA) was reported. Since the existing SBA frameworks for Chemistry and Combined Science (Chemistry part) were well-received by the teachers, it had been recommended to the SBA working group that the frameworks would remain unchanged.
2. Five meetings had been held by the working group under the One-committee for the medium-term review of Chemistry and Combined Science (Chemistry part) curricula from April to June. Parts of the suggestions from the working group were discussed. The deliberation was to be continued in the next meeting in August.
