

CDC-HKEAA Committee on Chemistry (2013-2015)
Gist of the 7th Meeting

Date of meeting: 30-3-2015

Salient points of the discussion:

1. The review of Science Education KLA Curriculum Guide and the latest development of the promotion of Science, Technology and Mathematics (STEM) Education were reported.
2. The progress and the suggested changes for the review of S1-3 Science curriculum were reported. Members put forward comments and suggestions for the chemistry-related topics in S1-3 Science.
3. The progress for developing learning and teaching resources in Chemistry, in particular e-learning related resources, were reported and discussed. It was suggested that more resources, such as experiments, should be provided for supporting teachers to deliver Topic XIV Materials Chemistry.
