

An Analysis of the Views of Various Sectors on the Mathematics Curriculum

FINAL REPORT

Research team:

Ngai-Ying Wong (Principal Investigator), CUHK

Chi-Chung Lam, CUHK

Frederick Koon-Shing Leung, HKU

Ida Ah-Chee Mok, HKU

Ka-Ming Wong, CUHK

Project Coordinator

Edith Ling-Yan Lai

June 1999

TABLE OF CONTENTS

EXECUTIVE SUMMARY	1
PRESS RELEASE	9
1. RESEARCH FRAMEWORK	11
1.1. Introduction	11
1.2. Research questions	12
1.3. The research plan	13
1.4. Methodology	14
2. RESULTS FROM RESEARCH 1	17
2.1. Introduction	17
2.2. Summary of results	17
2.2.1. Curriculum trends	17
2.2.2. Students' attitudes	17
2.2.3. Students' mathematics performance	18
2.2.4. Classroom practice	18
2.2.5. Issues concerning the Hong Kong mathematics curriculum	18
2.2.6. Hong Kong's mathematics education in the wider world	18
2.2.7. The importance of the teacher	18
2.3. Issues of major concern	19
3. QUESTIONNAIRE FOR STUDENTS	21
3.1. Instruments	21
3.1.1. Attitude towards mathematics and habits of learning	22
3.1.2. Conception of mathematics	22
3.1.3. Beliefs in mathematics	22
3.2. Pilot project	22
3.3. Sampling and administration	23
3.4. Results	24
3.4.1. Perceived difficulty of topics	24
3.4.2. Students' attitudes towards mathematics	26
3.4.3. Students' attitude: trends	28
3.4.4. Beliefs in mathematics	30
3.4.5. Learning habits	38
3.4.6. Responses to open-ended questions	38

3.5. Summary	44
4. QUESTIONNAIRE FOR PARENTS	49
4.1. Instrument	49
4.2. Sampling, pilot and administration	49
4.3. Results	49
4.3.1. High regard for mathematics	49
4.3.2. Views on the mathematics curriculum	49
4.3.3. Beliefs in mathematics learning	50
4.3.4. Perceived student difficulties	50
4.3.5. Learning behaviour	50
4.3.6. Learning problems	51
4.3.7. Parents' knowledge of the curriculum	51
4.3.8. Responses to open-ended questions	52
4.4. Summary	54
5. INTERVIEWS WITH STUDENTS	57
5.1. Sampling	57
5.2. Interview questions and procedures	57
5.3. Results: open-ended questions	57
5.3.1. Perception of mathematics	58
5.3.2. Perception of mathematics learning	61
5.3.3. Perception of mathematics classroom	65
5.3.4. Summary	67
5.4. Results: interviews	67
5.4.1. Classroom teaching	67
5.4.2. Understanding	69
5.4.3. Attitude	70
5.4.4. Curriculum	71
5.5. Discussions	75
6. INTERVIEWS WITH UNIVERSITY LECTURERS	79
6.1. Participants and procedure	79
6.2. Results	79
6.2.1. Perception of students' mathematical standards and performance	79
6.2.2. Expectations of students' mathematical standards and performance	80
6.2.3. Comments on the current school mathematics curriculum	81
6.3. Discussions	82

7. INTERVIEWS WITH HUMAN RESOURCES PERSONNEL	85
7.1. Participants and procedure	85
7.2. Results	85
7.3 Discussions	86
8. INTERVIEWS WITH CURRICULUM PLANNERS	87
8.1. Participants and procedure	87
8.2. Results and discussions	87
8.2.1. General opinions	87
8.2.2 The problems and weaknesses of the present curriculum	87
8.3. Discussion	89
9. QUESTIONNAIRE FOR TEACHERS	91
9.1 Instrument	91
9.1.1. Satisfaction with the existing curriculum	91
9.1.2. Perceived usefulness of teacher education	91
9.1.3. Major problems in mathematics education	91
9.1.4. Methods to cater for individual differences	92
9.1.5. Use of information technology	92
9.1.6. Beliefs on mathematics learning	92
9.2. Sampling and administration	93
9.3. Results	93
9.3.1. Teachers' background	93
9.3.2. Views on the curriculum	94
9.3.3. Views on teacher education	99
9.3.4. Major problems	99
9.3.5. Catering for individual differences	100
9.3.6. Use of information technology	100
9.3.7. Beliefs on mathematics learning and instruction	100
9.3.8. Responses to open-ended questions	104
9.4 Summary	106
10. INTERVIEWS WITH TEACHERS	109
10.1. Participants and procedure	109
10.2. Responses of primary mathematics teachers	109
10.2.1. Students' strengths and weaknesses in mathematics learning	109
10.2.2. Comments on the curriculum	110
10.2.3. Suggestions for changes of the current curriculum	111
10.2.4. Dealing with individual differences	112

10.2.5. Encouraging higher order thinking	113
10.2.6. Information technology	114
10.2.7. Other teacher concerns	115
10.3. Responses of secondary mathematics teachers	116
10.3.1. Students' strengths and weaknesses in mathematics learning	116
10.3.2. Comments on the curriculum	118
10.3.3. Suggestions for change of the current curriculum	121
10.3.4. Dealing with individual differences	122
10.3.5. Encouraging higher order thinking	123
10.3.6. Information technology	123
10.3.7. Other concerns expressed by teacher	124
10.4. Summary	125
11. RECOMMENDATIONS	129
11.1. Summary of findings	130
11.2. Conclusions	134
11.3. Recommendations	135
11.3.1. Curriculum structure	135
11.3.2. Principles of curriculum design	138
11.3.3. Implementation strategies	140
11.3.4. Assessment	140
11.3.5. Students' interest in early years	140
11.3.6. Information technology	141
11.3.7. The teachers	141
12. REFERENCES	143

APPENDIX

1. Questionnaire for Primary 3 students	147
2. Questionnaire for Primary 6 students	150
3. Questionnaire for Secondary 3 students	154
4. Questionnaire for Secondary 4 students	159
5. Questionnaire for Secondary 6 students	164
6. Level of difficulties of topics as perceived by Primary 3 students	171
7. Level of difficulties of topics as perceived by Primary 6 students	172
8. Level of difficulties of topics as perceived by Secondary 3 students	173
9. Level of difficulties of topics as perceived by Secondary 4 students	174
10. Level of difficulties of topics as perceived by Secondary 6 students	175
11. Attitude towards mathematics among Primary 3 students	178
12. Attitude towards mathematics among Primary 6 students	179
13. Attitude towards mathematics among Secondary 3 students	181
14. Attitude towards mathematics among Secondary 4 students	184
15. Attitude towards mathematics among Secondary 6 students	187
16. Questionnaire for parents of Primary 3 students	190
17. Questionnaire for parents of Primary 6 students	193
18. Questionnaire for parents of Secondary 3 students	196
19. Responses of Primary 3 parents	199
20. Responses of Primary 6 parents	202
21. Responses of Secondary 3 parents	205
22. Questionnaires for primary teachers	208
23. Questionnaires for secondary teachers	214
24. Responses of primary teachers	224
25. Responses of secondary teachers	228
26. Responses to open-ended questions to primary teachers	236
27. Responses to open-ended questions to secondary teachers	240
